Care Guidelines are overseen by the multidisciplinary Evidence Based Medicine Committee (a medical staff IOP Committee) whose duties are: To provide oversight for the coordination and improvement of highest quality, evidence-based care delivery at CHOC.

These guidelines also provide general information about pediatric assessment and care (for example, health maintenance), and pediatric procedures (for example, intraosseous infusions). The information presented is relevant to the practice setting of primary care nurses in Aboriginal communities and is derived from available best practice evidence.
Pediatric healthcare providers should educate patients and families about infection prevention policies that exist in emergency departments, hospitals, and clinics. Remind people to seek emergency care immediately, if indicated, as delaying care may cause harm. Primary care practices should continue to use infection prevention strategies including:
